

Manufacturing

Our grass is designed not to grow. Our company is just the opposite.

Fieldmasters has been in business for over 25 years and is still growing strong. By integrating all the manufacturing components under one roof, our products are literally built from the ground up by our manufacturer.

Fieldmasters is proud to be using the greenest product in the industry. Our manufacturer uses very little fossil fuels in the manufacturing process and by using the unique Duraflo E.E.B.S.® backing system, they produce products that are 100% recyclable.

Our commitment to service and quality has made us one of one of the most well-known and trusted company in the industry. We offer more than 40 styles of turf and the ability to produce custom specs. We challenge you to find a better product.

High Quality Materials

Tufting Process

Coating Process

Warehouse Inventory
